Even numbers: Student should know that the even numbers are 2, 4, 6 and 8. Color these numbers **blue** in the following 100 chart. So, it's a skip counting by 2's. Therefore each number with 2's place as 0, 2, 4, 6, 8 is an even number. If you understood color all the even numbers in the chart in **blue**.

Odd numbers: The odd numbers are 1, 3, 5, 7, 9 and all numbers having one's place as 1, 3, 5, 7, 9 also the odd numbers. Now color all the odd numbers in the chart red.

Note: One's place of a number is far right digit. For example in number 49, digit 9 is at one's place.
