

SOL'S / SCOPE & SEQUENCE / BLUEPRINTS

5.18

Math

STRATEGIES/ACTIVITIES

- using the number of students in the classroom, create variable sentences (i.e. nine boys + N girls = 25 students) – expand by using favorite foods, colors worn today, etc.)
- tell the students that the school nurse weighs a student, she subtracts 3 pounds for the weight of clothing – have the student write the expression using a variable

SOL'S / SCOPE & SEQUENCE / BLUEPRINTS	
Math	5.18
STRATEGIES/ACTIVITIES	
<ul style="list-style-type: none"> - have students survey the classroom to find situations to fit the following problem: $7 + n = 25$ – they are to work in pairs and record their answers - have students use newspaper ads or catalogs to find objects that equals the following problem: $\\$25.99 + n = \\48.50 – record your answers
