

Mean

Measure of
Central Tendency

Median

Mode

Range

3, 4, 5, 5, 6, 7, 8, 8, 9, 13

$$\frac{3+4+5+5+6+7+8+8+9+13}{12}$$

$$\frac{78}{12} = 6.5 \quad \text{The mean is 6.5}$$

The average of a group of numbers.

A measure used to describe data; the mean, median, and mode are measures of central tendency.

The middle number or the average of the two middle numbers in an ordered set of data.

The number or numbers that occur most often in a collection of data. There can be more than one mode or none at all.

The difference between the greatest and the least number in a set of numbers.
